

Professor Kenichi Yoshida

Professor Kenichi Yoshida of the University of Tokushima passed away on October 10, 2022 at age 75. Japanese AE community lost a mentor and a beloved colleague. His contributions to AE centered on the deformation mechanisms of intermetallic compounds, gas leakage detection and hydrogen damage evaluation of Al alloys. He enthusiastically participated in the national and international AE activities and helped many students and younger colleagues on AE research.

We express our heartfelt condolences to his family and relatives.

Tomoki Shiotani, Hirokazu Moriya, Yoshihiro Mizutani, Takeshi Yasuda
